RE: THEFT AND SELLING TO SCRAP METAL PROPRIETORS

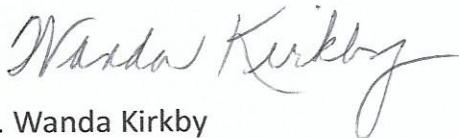

This letter is to reinforce my support of the efforts being made by the City of Brantford to combat the theft of items pertaining to our industry, i.e. like copper coils and scrap metal.

Our company was not only subjected to a break-in this past year totalling approximately \$10,000.00, added to that was numerous entries to our locked scrap metal bin, involving many sleepless nights and dealing with the Brantford Police. We have tried everything to deter these thefts but to no avail.

Items stolen are then purchased by the local scrap metal dealers, which we feel is making it all the more attractive for these thieves to steal. We believe shutting the ability for the scrap metal dealers to accept these items is the first step to end the theft.

Yours sincerely,

MODERN HEATING BRANTFORD LIMITED
