Date April 20, 2021 **Report No.** 2021-221

To Mayor and Members of City Council

From Nicole Wilmot, Director of Planning
People, Legislative Services and Planning

1.0 Type of Report

Consent Item ☐
Item For Consideration ☒

2.0 Topic **Part Lot Control Relief Application PLC-01-21 (All of Blocks 133 and 134, Registered Plan 2M-1955), 1-23 Amos Avenue (odd numbers only) [Financial Impact – None] (2021-221)**

3.0 Recommendation

- A. THAT Part Lot Control Relief Application PLC-01-21 submitted by Armstrong Planning on behalf of Empire Communities Ltd., applying to Blocks 133 and 134 on Plan 2M-1955 (1-23 Amos Avenue – odd numbers only) to create 12 townhouse lots and 8 associated access easements, BE APPROVED; and
- B. THAT a By-law to implement Part Lot Control BE PRESENTED to City Council for consideration and approval, which By-law shall automatically expire after a period of three years from the date of its passage at which time Part Lot Control will automatically be reinstated on the subject lands for reasons outlined in Report 2021-221.

4.0 Executive Summary

This Report evaluates an application for relief from Part Lot Control in order to create 12 lots for street townhouse units and 8 easements, each having a width of 1.5 m so that the residents of the interior street townhouse units can access their rear yards for maintenance purposes. The subject lands are located within a newer Plan of Subdivision (Registered March 11, 2020) which is required for division of land through Part Lot Control. The townhouse units are currently under development and have been reviewed through applications for Draft Plan of Subdivision (Files: 29T-15502 and subsequent redline draft Plan 29T-19501) and Zoning By-law Amendment applications (Files: PZ-13-15, PZ-01-19) and was approved by Council on June 25, 2019. No public hearing is required for applications for relief from Part Lot Control. The proposal is consistent with Provincial Policy Statement and conforms to the Growth Plan for the Greater Golden Horseshoe and the City of Brantford Official Plan. Planning Staff recommend that the application be approved.

5.0 Purpose

An application for Relief from Part Lot Control has been received for Blocks 133 and 134 on Plan 2M-1955 (1-23 Amos Avenue – odd numbers only). The application proposes to create 12 lots for street townhouses and 8 access easements, each having a width of 1.5 m so that the residents of the interior street townhouse units can access their rear yards for maintenance.

6.0 Background

6.1 Site Features and Surrounding Land Use

The subject lands are located on the south side of Amos Avenue between Witteveen Drive and Anderson Road. An aerial photograph, location map and photographs of the site are attached as **Appendices A, B and C** of this Report. The subject lands are located within a newer Plan of Subdivision Registered Plan 2M-1955 (see **Appendix D**) registered March 11, 2020 and are described as Wyndfield West Phase 6B. The townhouse dwellings are currently under construction as seen in the site photo attached as **Appendix C**. Surrounding land uses include residential uses including single detached and townhouse dwellings, and a large community park to the north.

6.2 Detailed Description of the Proposal

The applicant is requesting permission for relief from Part Lot Control to divide 2 blocks within the Registered Plan of Subdivision 2M-1955 into 12

lots for street townhouse units, and to create 8 access easements to permit rear yard access for the residents of the interior units, with each easement having a width of 1.5 m. The reference plan showing the lots and easements is attached as **Appendix E**. Wyndfield West Phase 6B has been reviewed and approved through the following applications: Draft Plan of Subdivision (Files 29T-15502 and 29T-19501), and Zoning By-law Amendment applications (File: PZ-13-15 and PZ-01-19).

The development of these lands including all site details (grading and servicing) have been appropriately addressed through the review of the Draft Plan of Subdivision application process and through the Subdivision Agreement which has been registered on title and accompanied by the necessary securities. The development is currently proceeding in accordance with this registered agreement. The foundation walls have been poured for the street townhouse blocks, and the lot lines can now be established prior to the sale of the individual lots.

7.0 Corporate Policy Context

7.1 Provincial Policy Context

Application PLC-01-21 was reviewed in the context of Provincial Policy including the Provincial Policy Statement (PPS) (2020) and A Place to Grow – Growth Plan for the Greater Golden Horseshoe (the Growth Plan). While the Provincial Policy Statement is silent on Part Lot Control, Staff has reviewed the development in the context of the Provincial Policy Statement and is of the opinion that the applicant's request is consistent with the Provincial Policy Statement as it promotes new growth in the existing settlement area that is of an appropriate form and density and makes efficient use of existing infrastructure. The Growth Plan outlines the principals that provide the basis for guiding decisions in the Greater Golden Horseshoe on how land is developed, resources are managed and protected, and public dollars are invested. Planning Staff is of the opinion that the applicant's request is consistent with the PPS and in conformity with the Growth Plan.

8.0 Input From Other Sources

8.1 Technical Liaison Response

Staff consulted with Engineering Services and the Building Department for comment and no objections or concerns were expressed.

8.2 Public Response

Under Section 50(29) of the *Planning Act*, a public hearing is not required to be held, and notice of passing of the Part Lot Control by-law is only required to be given to the owner of the land to which the By-law applies.

8.3 Grand River Notification Area Input

Notice is not required for a relief from Part Lot Control application.

9.0 Analysis

9.1 Official Plan Considerations

The subject lands are designated “Neighbourhood Residential” in the West of Conklin Secondary Plan, which forms part of the City’s Official Plan. This designation is intended to accommodate a range of housing types including single detached dwellings, as well as the street townhouses which are currently under construction. This application is in conformity with the Official Plan.

9.2 Zoning By-law Considerations

Existing Zoning: “Residential Medium Density Type A Zone - Exception 63”

The subject lands are zoned Residential Medium Density R4A Zone – Exception 63 (R4A-63) in Zoning By-law 160-90 (**Appendix F**). This zone permits a variety of uses, including double duplexes, fourplexes, block townhouses and street townhouse. Special Exception 63 provides Zone regulations specific to this development. The street townhouses that are currently under construction meet the requirements of the R4A-63 Zone.

9.3 Development Considerations

Approval of this application for relief from Part Lot Control will facilitate the creation of 12 lots for street townhouses and 8 related access easements to the rear yards. All of the street townhouses will be freehold units with frontage on Amos Avenue as well as creating access easements so that

the internal street townhouse units have access to their rear yards for maintenance purposes.

The process of Relief from Part Lot Control is a desirable way in which to create the lots and easements where the development proposal has been reviewed and considered through a public process associated with other planning approvals and implementing instruments, such as the applications to amend the Zoning By-law and for draft approval of the Plan of Subdivision. Once a By-law to relieve the subject lots from Part Lot Control is approved by Council, it is registered on title for the property.

As typical with other applications of this nature, Planning Staff recommends that the By-law expire three years from its date of passage, as that will provide sufficient time to create the lots and access easements. Upon completion of the registration, Part Lot Control will automatically be reinstated. The developer has indicated that the three years will allow sufficient time to complete the units and has indicated that the closing dates for some of the units are in early June 2021.

10.0 Financial Implications

There are no Municipal financial implications associated with this Part Lot Control Application.

11.0 Conclusion

The development is in conformity with the Official Plan, and has been reviewed through previous planning approval processes including the applications to amend the Official Plan and Zoning By-law, and Draft Plan of Subdivision. It is recommended that the implementing By-law expire after a period of three years at which time Part Lot Control will be reinstated. Planning Staff are satisfied that the recommendations contained in this Report are in accordance with the purpose and intent of the Part Lot Control process as provided under the *Planning Act*, and no municipal interests will be adversely affected, and recommend that the application for Relief from Part Lot Control be approved.
